Network Access

Incident Response

How it Works

Quest's Critical Incident Response Team specializes in dealing with a wide range of cyber incidents, including:

- **Viruses and Malware Attacks:** Rapid containment and removal to prevent spread and damage.
- **Hacker Intrusions:** Immediate actions to block unauthorized access and secure breached systems.
- **Service Disruptions:** Quick restoration of services to minimize downtime and maintain business continuity.

When a cyber security incident occurs, we are ready to act in real time, making sure your business is protected.

- **24/7 Incident Response Services:**
 - **Immediate Response:** A dedicated response within 60 minutes of your call, ensuring that every incident is addressed promptly.
 - **Expert Guidance:** Our team consists of seasoned cybersecurity professionals with extensive experience in incident handling and threat neutralization.
 - **Comprehensive Support:** From initial detection to post-incident analysis, we provide end-to-end support to not only address the immediate threat but also to strengthen your defenses against future attacks.

Thank you!
